JMC WISEdata 2018-19 Updates Part 8: Course Based CTE

March 2019

Paul Freid & Greg Gilman

Overview

- JMC has released a series of videos and documentation updates in October and early November.
- The videos will be short and will cover various small portions of WISEdata updates for 2018-19.

WISEdata Updates 18-19
PART 8: Course Based CTE

Course-based CTE reporting will be established based on students taking courses that are associated with CTE via the state course code tied to the course.

Some additional course/section data elements will also need to be designated for the CTE courses as well.

Also, CTE courses sections with a mix of CTE participants/concentrators and nonparticipants will need to be split into two separate course sections for correct WISEdata submission.

PART 8: Course Based CTE

State Course Codes associate a course with CTE
- See video 5 of this series for more details

For CTE courses the state course code is also associated with Career Pathways

You must designate at least one Career Pathway for your CTE course

Career Education Data Reporting

This diagram outlines the specific data reporting elements required for Career Education reporting. Career Education consists of College and Career Readiness (CCR) and Career and Technical Education (CTE) data reporting. Starting school year 2018-19, all public school districts will be required to submit the data found in both the yellow and green regions for students in grades 9-12 in order to satisfy CCR requirements. Additionally, districts who receive Carl Perkins funding are required to submit data found in the blue region for students in grades 11-12. For specific definitions, visit the WISE data elements webpage.
